

Teesside & District Branch

2019 ExpoTees Showcase BCS Award Presentations

Speakers: Students from Teesside University School of Computing, Media & the Arts

ExpoTees is The University of Teesside's annual exhibition of outstanding work from final year students from our School of Computing & Digital Technologies - and an opportunity to recruit bright, new talent to your organisation.

Meet a shortlist of the stars joining the workplace in 2019 as they present their projects, view their portfolios and listen to their ideas. This will be an interactive event. If you are interested in computer science, digital media and web, games, animation, journalism, film production and the arts come along and be amazed!

This year, shortlisted students from ExpoTees will present their projects at the Teesside & District Branch BCS meeting. The presented projects that are judged to include the most innovative use or development of computer science or technology will win an Amazon Dot, which will be awarded at the ExpoTees awards ceremony on Thursday 16th of May.
